Special broad-range* DNA analyses for birds - Paper Order

Important: Do not use this form if you have placed a Digital Order!

* Broad-range PCR tests detect different variants of a pathogen and are suitable for many different bird species. They can be used for cross-species pathogen screening and are not limited to virus analysis specific to parrots.

Last Name: _____ Company: _____
First Name: _____ Tel.: _____
Street: _____ Postcode/City: _____
E-Mail: _____ Country: _____

Sex = DNA-sexing (plucked feathers)

Circo = Avian Circoviruses (blood and feathers)
